

List of posters

P1-1	Investigations into the binding site promiscuity of MhsT	Neumann, C.	118
P1-2	Random microseeding as a new approach applied on haloalkane dehalogenase DbeA variant crystallisation	Prudnikova, T.	119
P1-3	Insights into ion selectivity and translocation in the bacterial magnesium channel CorA provided by anomalous diffraction experiments	Kruglyak, N.	119
P1-4	Studying the oxidation of water: The photosystem II story	Roy Chowdhury, S.	120
P1-5	Multiphase Liquid Crystalline Nanoassemblies with Protein Ordering	Angelov, B.	121
P1-6	Challenging crystallization obstacles at the ISPC	Hamer Rogotner, S.	122
P1-7	Towards a Crystal Structure of the Cystic Fibrosis Transmembrane Conductance Regulator	Fetics, S.	123
P1-8	Structural characterisation of amino acid membrane transporters	Arkhipova, V.	123
P2-1	“Closed cleft of O-acetyl serine sulphydralase (OASS) active site from <i>Brucella abortus</i> is responsible for loss CSC formation”	Dharavath, S.	124
P2-2	Characterization of immune modulatory protein complex CD160-HVEM participating in bidirectional signalling pathways	Nemčovičová, I.	125
P2-3	Expression, Purification and Biophysical Characterization of transfer proteins from the Gram-positive Conjugative Plasmid pIP501	Arumbakam Sridhar, A.	126
P2-4	Development and application of methodology for successful crystallisation of medically relevant proteins	Kassen, S.	126
P2-5	Structural studies of RNA-binding properties of archaeal Lsm proteins from <i>Methanococcus vannielii</i> and <i>Sulfolobus acidocaldarius</i>	Lekontceva, N.	127
P2-6	Crystallization of DC8E8 antibody tetrapeptide on the molecule of intrinsically disordered protein tau	Cehlár, O.	128
P2-7	Towards crystallization of the oncogenic transcription factor from the T-box family, TBX2	Kimani, S.	128
P2-8	Crystallization behaviour of glyceraldehyde dehydrogenase from <i>Thermoplasma acidophilum</i>	Iermak, I.	129
P2-9	HIV-1 Vpr steers the repair enzyme uracil DNA glycosylase towards destruction: The X-ray structure of the DDB1-DCAF1-Vpr-UNG2 complex	Calero, G.	130
P2-10	Integrated structural biology study of the outer membrane lipoprotein FrpD from <i>Neisseria meningitidis</i>	Sviridova, E.	130
P2-11	Antibody-assisted crystallization of a cell surface receptor	Obmolova, G.	131
P2-12	Structure-functional characterization of the member of alpha/beta- hydrolases superfamily - DpcA from <i>Psychrobacter cryohalolentis</i> K5	Tratsiak, K.	131
P2-13	Paralogous chemoreceptors with different ligand specificity mediate chemotaxis to amino acids in <i>Pseudomonas aeruginosa</i>	Gavira, J.A.	132
P2-14	Small angle solution scattering study of the complex formation between xanthine oxidoreductase and novel purine analog	Angelov, B.	133
P2-15	Structure of the C345c domain of murine complement component C4	Gadeberg, T.A.F.	133
P2-16	Structures of the FeSI and FeSII (Shethna) proteins of <i>Azotobacter vinelandii</i>	Kabasakal, B.V.	134
P2-17	Isolation and crystallization of plant PSII	Kohoutova, J.	135
P2-18	Crystallization and Structure Determination of human Aldehyde Oxidase and Complexes	Coelho, C.	135
P2-19	Structural studies of transcriptional metalloregulator protein CueR in complex with Hg ²⁺	Bugris, V.	137
P2-20	Structure and function studies of RNA-binding proteins with FAST motifs and a RAP domain	Kutner, J.	137
P2-21	Crystal Polymorphism of Multifunctional Plant Nuclease TBN1	Stransky, J.	138

P2-22	Crystallization and X-ray structural analysis of resurrected ancestor of haloalkane dehalogenase and <i>Renilla</i> luciferase	Chaloupkova, R.	139
P2-23	Structure of a ketosynthase-chain length factor of a polyunsaturated fatty acids synthase and its role in the architecture and function of the synthase complex	Santin Martinez, O.	140
P2-24	Structural characterisation of the human phosphatidylinositol 4-kinase II alpha	Baumlova, A.	140
P2-25	Unraveling the <i>B. pseudomallei</i> Heptokinase WcbL: From Structure to Drug Discovery	Vivoli, M.	141
P2-26	Crystallization of the MET extracellular domain with crystallization chaperones	Meyer, T.	142
P2-27	Crystallization and preliminary structure determination of <i>E.coli</i> arginyl-tRNA synthetase-tRNA (arg) complex	Lin, S. X.	143
P2-28	Purification, crystallization, and X-ray crystallographic studies on PseH, the <i>Campylobacter jejuni</i> N-acetyltransferase involved in pseudaminic acid biosynthesis	Yoon, S.	143
P2-29	Purification, crystallization, and X-ray crystallographic studies of <i>Bacillus</i> MazG-like protein, BC1531	Hong, M.	144
P4-1	Crystallography Platform at the Pasteur Institute	Weber, P.	145
P4-2	Microseed matrix screening: more hits in less time	Moroz, O.	145
P5-1	Relaxation of a large amount of Local Strain in Protein Crystals by using Seed Crystals	Koizumi, H.	146
P5-2	Graphene-Based Microfluidics for Serial Crystallography	Sui, S.	147
P5-3	Crystal Preparation, Scoring and Handling for time-resolved Serial Crystallography Applications	Botha, S.	148
P5-4	Dimer Asymmetry and Subunit Dynamics. Key Factors in Enzyme Catalysis of Fluoroacetate dehalogenase	Mehrabi, P.	148
P6-1	From the crystal to the structure thanks to an all-in-one lanthanide complex	Girard, E.	150
P6-2	Time-Resolved Crystallography of Proteins at the femtosecond X-ray plasma source in ELI beamlines	Angelov, B.	151
P7-1	A new design of plate geometry for efficient protein crystallization screening	Yin, D.	151
P7-2	Change of Fractal Dimension during the Nucleation Phase of Lysozyme Crystallization	Schrader, T.E.	153
P7-3	Crystallization of haloalkane dehalogenase DgaA isolated from <i>Glaciicola Agarilytica</i> NO ₂	Malakhova, D.	153
P7-4	Effects of Polyethylene Glycol 4000 and Sodium Chloride: 3-dimensional phase diagram for a protein crystallization	Takahashi, S.	154
P7-5	Structure investigation of nature polyether products biosynthesis	Wang, Q.	155
P7-6	Metallacarborane inhibitors of Carbonic Anhydrase IX, promising compounds for therapy and diagnostic	Brynda, J.	155
P7-7	Tailored suits fit better: Customized crystallization screens – the key to success?	Mlynek, G.	156
P8-1	In-situ observation of protein crystal growth under magnetic quasi-microgravity conditions on earth	Tanokura, M.	157
P8-2	Biophysical and structural characterization of dipeptidyl peptidase III from <i>Porphyromonas gingivalis</i>	Hromic, A.	158
P8-3	The effect of audible sound on protein crystallisation	Zhang, C.	159
P8-4	Crystallogensis studies of bacterial aminoacyl-tRNA synthetases as potential targets for drug design	de Wijn, R.	160
P10-1	CRISTALES: a world to discover. An exhibition for schools and universities	Gonzalez Ramirez, L.A.	160
P10-2	The Microgravity Program's Biophysics Initiative	Gorti, S.	161
P11-1	X-ray compatible microfluidic device for protein crystallization and mapping phase diagrams	Junius, N.	161
P11-2	Growing lysozyme crystals to the size of mm ³ for neutron diffraction	Poulsen, J.C.	162
P12-1	The fine-tuned machinery of O ₂ -tolerant [NiFe] hydrogenase	Schmidt, A.	163

P12-2	Deciphering the structural and functional aspects of GGEEF protein domain involved in lifestyle switch of <i>Vibrio cholerae</i>	Bandekar, D.	164
P12-3	Structural Comparison of Putative Alanine Racemases Alr and YlmE from <i>Streptomyces coelicolor</i> A3(2)	Tassoni, R.	165
P12-4	Crystallization and structure solution of phospholipase acyltransferase in complex with potent inhibitors	Zwiers, K.	166
P12-5	Thiosulfate Dehydrogenase (TsdA) from <i>Allochromatium vinosum</i> : Structural and Functional Insights into Thiosulfate Oxidation	Brito, J.A.	166
P12-6	Crystal structure analyses of dipeptidyl peptidase 11 from <i>Porphyromonas gingivalis</i>	Tanaka, N.	167
P12-7	Structural insides into substrate tunnels of bacterial lipoxygenase from <i>Pseudomonas aeruginosa</i>	Kalms, J.	168
P12-8	Crystallization of resurrected ancestors of haloalkane dehalogenase DbjA and DbeA	Babkova, P.	169
P12-9	Protein-ligand interactions in haloalkane dehalogenases	Kuty, M	170
P12-10	Mechanism and Energetics of L-Arginine Binding to Arginine Repressor Protein in <i>E. Coli</i>	Minofar, B.	170
P13-1	Crystallization of molecular chaperone essential for protein disaggregation	Orlikowska, M.	171
P13-2	Strategies for recombinant expression of difficult targets for protein crystallography: piggyBac DNA transposase deployed	Blaha, J.	171
P13-3	XRayLab: a novel X-ray diffraction facility for the ISS	Peignier, T.	172
P13-4	Structural investigations of the Interleukin-5 receptor ectodomain	Scheide, J.P.	173
P13-5	Structural insights into the dual strategy of recognition by peptidoglycan recognition protein: Structure of the ternary complex of PGRP-S with lipopolysaccharide and stearic acid	Sharma, P.	174
P13-6	Crystal Structure of Inorganic Pyrophosphatase from <i>Acinetobacter baumannii</i>	Tarver, C.	175
P13-7	Crystallization and determination of the crystal structure of Angiopoietin-related protein 4 from human	Biterova, E.	175
