

Lectures

L1	Principles of protein crystallization I: The nature of protein crystals and the physical chemistry of their formation	Bernhard Rupp	13
L2	Crystallization of Membrane Proteins in Lipidic Systems	Martin Caffrey	13
L3	An introduction to crystal morphology and crystal growth mechanisms	Juan Manuel García-Ruiz	14
L4	Conventional Crystallization Methods and their Modifications	Jeroen R Mesters	14
L5	Principles of protein crystallization II: Methods, evaluation, and properties of 'real' crystals	Bernhard Rupp	15
L6	Capillary counterdiffusion technique for protein crystallization and screening	Juan Manuel García-Ruiz	15
L7	Interpretation of the crystallization drop results	Terese Bergfors	16
L8	Crystallization of Protein-Nucleic Acid Complexes	Christian Biertümpfel	16
L9	Seeding Strategies for "Random" Crystal Screening and Crystal Optimization	Stefan Kolek	17
L10	UV to the rescue!	Jessica Bruystens	17
L11	Publication of scientific results with emphasis on crystallization communications	Howard Einspahr	18
L12	From protein expression and purification to its crystallization	Radka Chaloupková	18
L13	Preparation of protein samples for crystallization experiments	Pavlna Řezáčová	19
L14	Preparation of macromolecular complexes for crystallization	Ivana Nemčovičová	19
L15	Protein as the main variable in crystallization	Lubica Urbániková	21
L16	“What to do if everything has failed”	Terese Bergfors	21
L17	A historical perspective on protein crystallization from 1840 to the present day	Richard Giegé	22
L18	Crystallization in microfluidic systems: strategies and perspectives	Claude Sauter	23
L19	Crystallization screening - new approaches	Marc Pusey	24
L20	Tips and tricks for protein crystal manipulation and handling	José A. Gavira	24
L21	DLS Measurements prior to crystallization experiments	Christian Betzel	25
L22	Some methods to maximize the probability of protein crystallization	Da-Chuan Yin	26
L23	Assesing the diffraction quality of crystals	Vernon Smith	26
L24	Unconventional Crystallization Strategies and Techniques for Screening and Optimization	Naomi E. Chayen	27
L25	Large volume crystal growth in restricted geometry for neutron crystallography	Joseph D. Ng	27
L26	Optimisation of Crystal Growth for Neutron Crystallography	Monika Budayová-Spano	28
L27	Preparation of Micro- and Nano-Crystals for Free-Electron-Laser and Synchrotron Radiation Sources	Christian Betzel	29
L28	A rational approach to crystallising proteins in the pharmaceutical industry, the impact of micro seed matrix seeding	Allan D'Arcy	30

Exercises

E0	Introduction to lab exercises - macromolecular crystallization	Ivana Kutá Smatanová	31
E1	Conventional crystallization methods and their modifications: Exercises	Jeroen Mesters	33
E2	The secret life of your crystallization drop: Do you know what really happens in your drops?	Bernhard Rupp	34
E3	Crystallization of membrane proteins in lipidic mesophases	Martin Caffrey	34
E4	Manual Seeding Lab Exercises	Terese Bergfors	35
E5	Protein crystallization using the GCB	José A. Gavira	35
E6	Conventional techniques and crystallization of own proteins	Jeroen Mesters José A. Gavira Eubica Urbániková	36
E7	Practical Considerations for the Crystallization of Protein-Nucleic Acid Complexes	Christian Biertümpfel	37
E8	Evaluation of crystallization trials with the UVEX microscope	Jessica Bruystens	37
E9	"Random" Microseeding	Stefan Kolek, May Marsh, Allan D'Arcy	37
E10	Publication of Scientific Results With Emphasis On Crystallization Communications	Howard Einspahr	38
E11	Dynamic light scattering	Karsten Dierks	38
E12	Trace Fluorescent Labeling for Protein Crystallization Screening	Marc Pusey	39
E13	Crystallization under oil - Unconventional Crystallization Techniques for Screening and Optimisation	Naomi E. Chayen and Lata Govada	39
E14	From the biomolecule solution to its 3D structure in a microfluidic chip	Claude Sauter	40
E15	How to perform diffraction experiment ?	Vernon Smith	40
