## Struktura 2022 June 20-23

Struktura 2022 is organized fully as in person meeting after three years break due to pandemy. We planned the largest satellite of the IUCr25 congress - School on Electron Crystallography to hotel Dvořák in Tábor where Struktura 2016 took place but we had to postpone it in 2020 and finally cancel it in 2021. Fortunately, the congress itself could be successfully organized in hybrid form in August 2021, in Prague. An article about this congress is included in this issue.

We are returning to this beautiful place and the participation - 90 people is higher than in 2016. One full day is devoted to the meeting of users of neutron scattering, and also of synchrotron radiation with a few guests from large European facilities. Another day, already the 15th student symposium and competition with participation of 20 students is organized. Election of a new board of Krystalografická společnost will be completed during the conference.

Electronic version of the journal can be found at <http://www.xray.cz/ms> together with the instructions for the authors.
