

## Posters

<b>P01</b>	<b>Miroslava Alblová</b>	Protein Production Facility – DNA & Proteins for Your Research	p. 31
<b>P02</b>	<b>Vladena Bauerová-Hlinková</b>	The effect of the cardiac-associated mutations on the biophysical properties, fold and structure of the N-terminal domain of human ryanodine receptor 2	p. 32
<b>P03</b>	<b>Gabriela Balíková Novotná</b>	RIBOTUNER – the interplay of antibiotics, ribosomes and ABCF ATPases in fine tuning gene expression	p. 32
<b>P04</b>	<b>Viktor Bartošik</b>	Solution Structure of cAMP-dependent Protein Kinase RII $\alpha$ Subunit in Complex with Microtubule Associated Protein 2c	p. 33
<b>P05</b>	<b>Cyril Bařinka</b>	Inhibition of histone deacetylase 6 by 1,2, 4-oxiadiazoles: structural and biochemical characterization	p. 33
<b>P06</b>	<b>Jakub Benyřek</b>	Targeting the mRNA capping machinery of <i>Trichomonas vaginalis</i> as therapeutic approach in treatment of trichomoniasis	p. 34
<b>P07</b>	<b>Jan Beránek</b>	Monte Carlo simulations of miniprotein folding sampled with an autoencoder	p. 34
<b>P08</b>	<b>Jayashri B. Bhosale</b>	Structural insights into 14-3-3-mediated regulation of human ASK1	p. 35
<b>P09</b>	<b>Tomáš Brom</b>	Replication and transcription regulator Rta of Epstein-Barr virus - functional and structural implications for new antiviral strategy	p. 36
<b>P10</b>	<b>Ondřej Bulvas</b>	Dynamic Allosteric Regulation of Mycobacterial Inosine Monophosphate Dehydrogenase	p. 36
<b>P11</b>	<b>Tereza Buráňová</b>	Unravelling the mysteries of novel two-domain lectins from opportunistic human pathogens	p. 37
<b>P12</b>	<b>Ondrej Cehlár</b>	Structure of DC11 Fab fragment specific for the pre-aggregation conformation of IDP tau	p. 37
<b>P13</b>	<b>Zuzana Cieniková</b>	Genome anchoring, 812 retention, and release by neck proteins of <i>Staphylococcus</i> phage	p. 38
<b>P14</b>	<b>Tatsiana Charnavets</b>	Biophysical characterization of biomolecules at the Centre of molecular structure	p. 39
<b>P15</b>	<b>Fanny Demay</b>	Identification of a novel erythromycin resistance mechanism mediated by MRMA methyltransferase in <i>C. Difficile</i>	p. 39
<b>P16</b>	<b>Adéla Fejfarová</b>	Structural studies of biologically relevant protein variant of cancer-related Carbonic Anhydrase IX	p. 40
<b>P17</b>	<b>Thomas Fellmeth</b>	Influence of the Reparametrisation of the Protein-Water Interactions on the Conformation Ensemble of Tau(210-240)	p. 40
<b>P18</b>	<b>Růžena Filandrová</b>	Investigating Nucleosome Spacing as an Epigenetic Regulatory Mechanism	p. 41
<b>P19</b>	<b>Zdeněk Futera</b>	Structural, Solvent, and Temperature Effects on Protein Junction Conductance	p. 42
<b>P20</b>	<b>Tibor Füzik</b>	Asymmetric particles of TBEV provide insight into mechanisms of flavivirus assembly and maturation	p. 43
<b>P21</b>	<b>Alexandra Gredová</b>	Structural Characterization of AIRE and Its Interactions	p. 43
<b>P22</b>	<b>Tomáš Greňa</b>	Search for pathology-inducing in vitro tau filaments	p. 44
<b>P23</b>	<b>Jindřich Hašek</b>	Understanding the protein crystallization	p. 44
<b>P24</b>	<b>Petra Havlíčková</b>	When Signaling Goes Astray: Understanding MAP2K1 Mutations in Neurodevelopmental Disorders	p. 46
<b>P25</b>	<b>Josef Houser</b>	New kids on the block: Update on equipment installed at BIC Core Facility, CEITEC, Brno	p. 46

<b>P26</b>	<b>A. Hrádková</b>	Structural variability of peptide deformylase	p. 47
<b>P27</b>	<b>Jakub Hrubý</b>	Leaking Water into a TEM: Methods to Overcome Preferred Orientation in Cryo-EM	p. 48
<b>P28</b>	<b>Kateřina Jirásková</b>	Enhancing PETase Efficiency: A Unified Approach to Production and Activity Assessment	p. 49
<b>P29</b>	<b>Barbora Kaščáková</b>	Targeting 3Cpro: A Novel Strategy for Effective Enterovirus D68 Inhibition	p. 49
<b>P30</b>	<b>Veronika Klápšřová</b>	Structural characterization of the interaction between BRCA1-BARD1 and RNA polymerase II	p. 50
<b>P31</b>	<b>Tomáš Kovalř</b>	Using mass photometry for sorting and selection of natively purified protein complexes	p. 51
<b>P32</b>	<b>Dalibor Košek</b>	Structural bases of “copy-out-paste-in” transposition	p. 51
<b>P33</b>	<b>Aneta Kozeleková</b>	Protein production in mammalian cells vs <i>E. coli</i> – impact on Tau protein properties	p. 52
<b>P34</b>	<b>Matyas Laníček</b>	Structural characterisation of proteins involved in the metabolism of R-loops	p. 52
<b>P35</b>	<b>Stanislav Macháček</b>	Structural Insights into Fatty Acyl Desaturases and Reductases in Insect Pheromone Biosynthesis	p. 53
<b>P36</b>	<b>Katarína Martonová</b>	Structure of tau filament core fragment dGAE with MN423 antibody	p. 53
<b>P37</b>	<b>Michaela Mikysková</b>	Discovering structural secrets of a jacalin-related lectin: a fun guy among the fungi	p. 54
<b>P38</b>	<b>Lucia Motlová</b>	Structures of the GCPII and PSMA-617 and Its Derivatives with Modified Lipophilic Linker Regions complexes	p. 55
<b>P39</b>	<b>Ondřej Mixl</b>	Role of non-canonical nucleotides in protoribosome	p. 55
<b>P40</b>	<b>Jiří Pavlíček</b>	Core Facility Devoted to Crystallization of Proteins and Nucleic Acids, Centre of Molecular Structure, IBT CAS	p. 56
<b>P41</b>	<b>Adam Polák</b>	Validation of small structure motifs in disordered proteins by molecular dynamics simulations	P. 56
<b>P42</b>	<b>Yelizaveta Pulnova</b>	Laser-driven plasma X-ray source at ELI Beamlines	p. 58
<b>P43</b>	<b>Mateo Seoane Blanco</b>	PhiKZ baseplate structure	p. 58
<b>P44</b>	<b>Sahra Setenay Baran</b>	Improved validation and refinement of biomolecular structures	p. 58
<b>P45</b>	<b>Martin Sitte</b>	Functional characterisation of the luminous apparatus of the sea pen <i>Pennatula phosphorea</i>	p. 59
<b>P46</b>	<b>Jan Stránský</b>	CF Diffraction Techniques in Centre of Molecular Structure: Employing high-end X-ray technologies for laboratory structural biology	p. 60
<b>P47</b>	<b>Guglielmo Tedeschi</b>	MAVISp: A Modular Structure-Based Framework for Protein Variant Effects	p. 60
<b>P48</b>	<b>Ondřej Vaněk</b>	Crystal structure of human NK cell activation receptor NKp80	p. 61
<b>P49</b>	<b>Viliam Volko</b>	NMR structural and interactional characterization of human Tau protein	p. 62
<b>P50</b>	<b>Jitka Vysloužilová</b>	Structure and Dynamic Properties of Porphyrin Aggregates in Solution	p. 62
<b>P51</b>	<b>Lisa-Maria Weinhold</b>	A pY Reader of ARID1A Facilitates Signal-Dependent cBAF Activity	p. 63
