P01	Kristýna Adámková	Expression and characterization of novel S1/P1 nuclease TbrN1 from protozoan parasite <i>Trypanosoma brucei</i>	p. 28
P02	Dominika Bachanová	Mutation-resistant neutralization antibody AX677 recognizes specific epitope on the inner face of SARS-CoV-2 spike protein RBD	p. 28
P03	Gabriela Balíková Novotná	A New Antibiotic Resistance Enzyme for a Classic Target: MrmA Redirects Radical SAM Methylation to 23S rRNA A2058	p. 30
P04	Viktor Bartošík	C-terminal domain of delta, an auxiliary RNA polymerase subunit	p. 30
P05	Cyril Bařinka	Structure-guided humanization and engineering of a high-affinity anti-PSMA antibody	p. 31
P06	Jakub Benýšek	Crystal structures of mRNA cap-forming enzymes: TvRNMT1 and Tv2'-O-MTase of <i>Trichomonas vaginalis</i>	p. 31
P07	Jan Beránek	Monte Carlo simulations of miniprotein folding sampled with an autoencoder	p. 32
P08	Jayashri B. Bhosale	Structural basis of ASK1 regulation: from 14-3-3 mediated inhibition to MKK7 substrate recognition	p. 32
P09	N. Bragina	Murine NKR-P1C, a key activating receptor in NK cell immune surveillance	p. 33
P10	Tomáš Brom	Molecular basis of DNA binding and oligomerization by Replication and transcription regulator Rta of Epstein-Barr virus	p. 34
P11	Adam Brzezina	Biophysical Characterization of Proteins and Protein Complexes by Sedimentation Velocity Analytical Ultracentrifugation	p. 34
P12	Tereza Buráňová	When LecB Is Not Alone: Structural and Functional Analysis of a Two-Domain Lectin	p. 35
P13	Ondrej Cehlár	Preparation and characterization of oligomers formed by truncated tau proteins in vitro and in silico	p. 35
P14	Tatsiana Charnavets	Biophysical techniques at the Centre of molecular structure	p. 36
P15	Michal Doleřal	Structural basis of ATP-mediated inhibition of mycobacterial GMP reductase	p. 37
P16	Radka Dopitová	From Gene to Protein: Launching an Integrated Protein Production Service at CEITEC MU	p. 37
P17	Adéla Fejřarová	Structural complexity in bacterial transcription regulation	p. 38
P18	Thomas Fellmeth	Force-Field Dependent Changes in the Conformational Ensemble of Tau(210–240) Under Tuned Protein–Water Interactions	p. 38
P19	Samuel Gorta	ExTraMD—A Service for Efficient Extension of Molecular Dynamics Simulations in Latent Space	p. 39
P20	Alexandra Gredová	Characterization of the AIRE Interactome in Transcriptional Regulation	p. 39
P21	Lenka Gryčová	Microtubule-associated protein TPPP1 expands the microtubule lattice	p. 40
P22	Romana Halová	Effect of 14-3-3 protein family on Tau protein Fibre formation	p. 40
P23	Anna Hanzlíková	Structural Characterization of the 16S rRNA Methyltransferase RsmH from <i>Staphylococcus aureus</i>	p. 41
P24	Iveta Harařřtová-Pavlová	Detection of Neurochemical Brain Profiles in Rats Using ¹ H MRS	p. 41
P25	Petra Havlíčková	Structural and Functional Characterization of Iripin-7 from <i>Ixodes ricinus</i> Reveals Determinants of Protease Specificity	p. 42

P26	Martin Jakubec	Chemiluminescent deoxyribozyme sensors for DNA-editing enzymes	p. 42
P27	Veronika Klápšřřovřř	Protein Production Facility – DNA & Proteins for Your Research	p. 43
P28	Petr Kolenko	Correction for multi-lattice translocation defects in diffraction data from crystals of zinc-dependent nucleases	p. 43
P29	Tomřřř Kouba	cryo-EM towards visualization of small molecules	p. 45
P30	Anna Kozřřřkovřř	Building Legos: Purification and Reassociation of Bacillus subtilis RNA Polymerase Initiation Complex	p. 45
P31	Zuzana Krřřřřřovřř	Probing the specificity of fluorescent deoxyribozymes using single-step selections and machine learning	p. 46
P32	Aleřř Křřenek	Molecular Dynamics Beyond Commandline	p. 46
P33	Pavel Křřepelka	Automated High-Resolution Cryo-FIB-SEM Volume EM Enables Sub-Volume Averaging of Cellular Structures	p. 47
P34	Monika Kubiřřřkovřř	Mass photometry as a convenient tool in SQ assessment routine	p. 47
P35	Jaroslav Kurfřřřřř	Use of bioinformatics in the development and optimization of catalytically active DNA	p. 48
P36	Rudolf Kvařřřřřovskřřř	Simulation Model of the Mitochondrial Ribosome	p. 48
P37	Patrik Lettrich	Development and application of catalytic DNA molecules	p. 49
P38	Katarřřřřřna Martonovřř	Identification of key regions in aggregation-prone dGAE fragment of tau	p. 49
P39	Atripan Mukherjee	Ultrafast Photophysics of Axitinib by Transient Absorption Spectroscopy and Femtosecond Stimulated Raman Spectroscopy	p. 50
P40	Ivana Nřřmřřřovřřřkovřř	Surface-enriched HCMV UL141 is EndoH-resistant in virions and engages soluble receptors by SPR	p. 51
P41	Nikola Noskovřř	Uncovering the Assembly of the RISC-Loading Complex	P. 52
P42	Elizaveta Nosova	Methyltransferases Rv2847c (CysG), Rv0470c (PcaA), and Rv2954c as potential anti-tuberculosis drug targets	p. 52
P43	Jana Novotnřř	Comparison of 5-fluorotryptophane and 6-fluorotryptophane labelling in 14-3-3 proteins	p. 53
P44	Eva Paulenovřř	PHL2: a black sheep of the PLL lectin family	p. 54
P45	Jiřřř Pavliřřřek	Core Facility for Crystallization and Diffraction of Proteins and Nucleic Acids, Centre of Molecular Structure, IBT CAS, BIOCEV	p. 54
P46	Eliřřřka Pirnosovřř	The odd one out: Investigation of the 14-3-3 η thermostability	p. 55
P47	Yelizaveta Pulnova	Plasma X-ray source for time-resolved diffraction in ELI	p. 56
P48	Jan Skořřepa	Identification of Inhibitors of the Polymerase Domain of the Dengue Virus	p. 56
P49	Martin Slavřřřk	Regulation of Nedd4-2 by Ndfip adaptor proteins	p. 57
P50	Vojtřřřek Spiwok	Design of proteins by metadynamics in the sequence space	p. 57
P51	Jiřřř Srogořř	Native purification and structural characterisation of RNA polymerase complexes from Bacillus subtilis	p. 58

P52	Jan Stránský	Diffraction Techniques in Centre of Molecular Structure: Employing high-end X-ray technologies for laboratory structural biology	p. 58
P53	Róbert Šándor	Phosphorylation of Microtubule-Associated Protein 2c by Serine/Threonine Kinases and the Effect of Phosphorylation on its Interactions	p. 59
P54	Hana Šimečková	Structure of the LE3 phage infecting <i>Leptospira biflexa</i>	p. 60
P55	Jana Škerlová	Molecular Insight into 5' RNA Capping with NpnNs by Bacterial RNA Polymerase	p. 60
P56	Michaela Škrabaňová	Contribution of the Institute of Neuroimmunology SAS, Bratislava to the Advanced Protein Biotechnology Consortium	p. 61
P57	Guglielmo Tedeschi	CVFormer	p. 62
P58	Vojtěch Vařečka	Beyond IC50: A Re-Engineered Stopped-Flow Kinetic Framework for Human Carbonic Anhydrase Inhibition Studies	p. 62
P59	Michal Vaško	Structural Characterization of METTL21A Inhibition by Novel Small Molecules	p. 63
P60	Jitka Vysloužilová	Simulation of Electron Transfer on Biomolecular Bridges by Non-Adiabatic Molecular Dynamics	p. 64
P61	Miroslava Albová	Centre of Molecular Structure – Protein Production and Technologies for Structural and Biophysical Analysis	p. 8
