STRUKTURA 2026

25.5.-29.5.2026

Hotel Grand Litava, Beroun

Struktura 2026 is organized close to Prague, in Beroun, and it includes the 17th student symposium and competition. In the last Struktura a few sessions were devoted to neutron scattering. This year, more contributions on electron diffraction will be presented. This area has an increasing importance in modern crystallography and structure analysis. One session is devoted to the history of crystallography and discussions will mainly be focused on the preparation of the 36th European Crystallographic Meeting next August in Prague Congress Centre.

There are over 70 registered participants. One excursion is organized for them, a visit of Koneprusy caves that are quite close to the conference venue.

At the end of the issue, a few obituaries are included, most of which should have already been published earlier.

Electronic version of the journal can be found at <http://www.xray.cz/ms> together with the instructions for the authors.
